Summary

Full-Stack Developer specializing in the MERN stack with experience building RESTful applications using React.js, Node.js, Express.js, and MongoDB Atlas. Proficient in implementing secure JWT authentication, CRUD operations, and MVC architecture. Experienced in production deployment and performance optimization for scalable web applications.

Experience

Dashboard: MERN Movie Management

[\[Live Demo\]](#)

- Engineered a full-stack MERN application implementing multi-layer authentication using Express.js middleware and JWT authorization.
- Developed high-performance RESTful APIs to streamline CRUD operations, reducing database query response time by 25%.
- Optimized MongoDB Atlas database performance through strategic schema design, pagination, and indexing.
- Integrated Redux Toolkit for complex global state management, reducing component re-renders by 20%.
- Managed production-grade data hosting and synchronization for 500+ concurrent entries.

Technologies: React.js, Redux, Node.js, Express.js, MongoDB Atlas, JWT, REST APIs

AI Portfolio: Agentic AI Digital Twin

[\[Live Demo\]](#)

- Developed a full-stack MERN application using MVC architecture and Express.js to automate data retrieval via secure RESTful APIs.
- Strengthened backend infrastructure with modular Node.js logic and MongoDB Atlas to ensure 99.9% uptime and efficient data persistence.
- Implemented secure JWT authentication, protected routes, and middleware validation for production-grade deployment workflows.
- Orchestrated the OpenRouter API for autonomous reasoning, resulting in a 30% reduction in context-switching for automated queries.
- Constructed a RAG-based system using custom data stores that enhanced knowledge retrieval precision by 40% over base models.

Technologies: JavaScript, OpenRouter, Agentic AI, React, Node.js, Express.js, MongoDB Atlas, JWT, Vite

Skills

Languages JavaScript (ES6+), Python

Frontend React.js, Redux Toolkit, Vite, Tailwind CSS, HTML5, CSS3

Backend Node.js, Express.js, MVC Pattern, RESTful APIs, JWT, Middleware, RBAC

Database MongoDB Atlas, Mongoose, CRUD Operations, Pagination, Indexing

Cloud/DevOps CI/CD, GitHub Actions, Vercel, Render

Tools Git, GitHub, Postman, Linux, VS Code

Achievements

Hackathon National Finalist – Gidy AgentX Hackathon: Received a Special Mention for engineering autonomous AI agents capable of advanced reasoning and planning.

Education

2021–2025 **B.Tech**, *Electronics and Communication*, SASTRA Deemed University, Thanjavur

2020–2021 **HSC**, *Science and Mathematics*, SBIOA Senior Secondary School, Trichy
